

Protect your back

- with a height-adjustable nursing table from Pressalit Care

Proper healthy working posture demands flexible solutions. With more than 30 years' experience in the healthcare industry, Pressalit Care is now introducing a whole new generation of height-adjustable nursing tables with optional sanitary appliances. The design of the tables enables child care and hospital personnel to wash and dress children and offer the necessary care without causing harmful strain to the back.

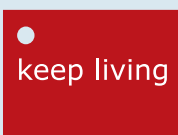

All nursing tables are equipped with an electric motor and a handheld remote control for easy and stepless height adjustment.

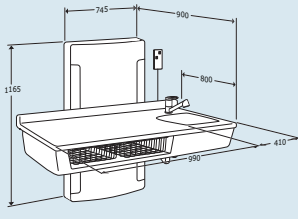

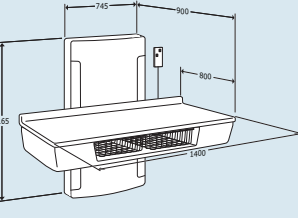

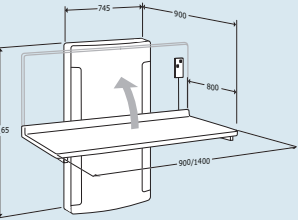

A height-adjustable nursing table is an investment in a safe working environment. The height-adjustable feature means that users can freely set the table to an optimal working height and thus avoid strenuous working positions.

Low start height nursing tables offer the added advantage that ambulant children can easily crawl on and off the nursing table thus reducing heavy unnecessary lifting to a minimum.

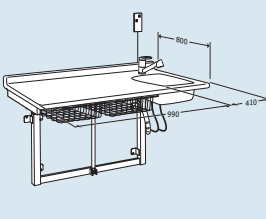

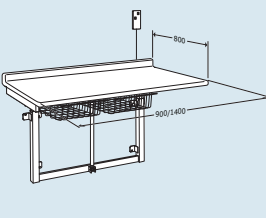

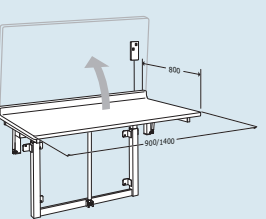

- Variable height adjustment ensures that it is always possible to adjust the nursing table to the ergonomically correct height.
- To facilitate access to running water the nursing table can be supplied with a built-in sink and a mixer tap with pull-out spout.
- The robust materials and moulded sink facilitate the cleaning of the changing area and ensure optimal hygiene.
- Well-conceived design and integrated safety systems prevent pinching accidents and provide greater safety in busy everyday working situations.

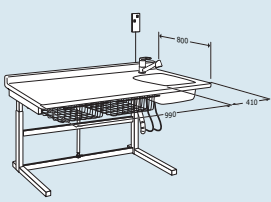

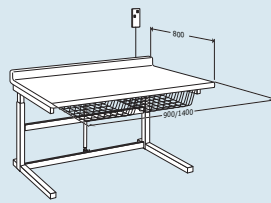

Low start height nursing tables, wall-hung. Height-adjustable from 300 – 1000 mm

<p>Nursing table with sanitary appliances</p> <p>800 x 1400 mm, electric motor with handheld remote control R8782000</p> <p>Incl. transformer, safety stop, integrated sink, tap with pull-out spout, feed/waste system, 2 wire baskets.</p>		 <p>R8782000</p>
